Please do the right thing by your neighbors, by your schools, by your environment and VOTE TO BAR the basing of the F-35s at BIA. Consider the thousands of hard-working families who will be directly impacted by homes losing value, not to mention the schools, the increased safety risks, the tripling of noise, and the overall attraction of the beautiful greater Burlington area. Thank you for your consideration.

The fumes from the plane's exost is bad for health & the environment. Vermont is also a very liberal state with regards to peace instead of war & stationing those planes here is a sign that Vermont supports a bloated military budget which goes against the values which lots of us here share.

I'm sure the military is selling this project to your community as a way to create jobs and inject funding into the area, but the jobs will go to outsiders, and the problems it will create will cost the local community to fix--the military won't be paying the taxes for your schools or roads or services. Say no to the F-35.

Another weapon system in search of a mission that kills jobs and takes food out of the mouths of children and leaves our schools and infrastructure in tatters. We don't need this overpriced white elephant, especially when we have several planes in the inventory that are better (and flown better) than any other fighter in the world.

War is anathema. We will be lucky if we have fifty years to cope with Climate Change. Coping with Climate Change must, absolutely, be our top priority! War games are satanic science fiction. We must put satanic war games behind us! We will all be extinct within fifty years if we don't cope with Climate Change. Living in tune with Nature is the only answer for Mankind from now on!

This is an example of gross waste in the military budget and an extremely unwise decision about where to place the base. Densely populated areas are not a good place to start a new airbase. F-35 warplanes are not needed and are not a good products. stop wasting our money. The City Council must support the resolution to bar the planes.

Considering what a boondoggle the F-35 has been for the military-industrial complex (that President Eisenhower warned us against), a plane that cannot fly in inclement weather nor be effective in combat, the plane would be a disaster for the National Guard as well.

---

I support Burlington City Council to bar these warplanes and to oppose any military efforts from their city.  
Violence begets violence. Peace by way of war is life purity by way of fornication. War is not the answer!!!

send these jets to Alaska. please. our senator begich has saved this airbase from federal cuts. I talked with one of the F-16 pilots who said this base in Alaska was the best place to train in the country. Alaska wants these fighter pilots to train here. Just ask Senator Begich. If we need this kind of weaponry than train in a place that is unpopulated, at least.

Why do you complain? The program barely cost \$5000 for every man, woman and child in the US. Such a pitiful amount does not even start to cover the expenses of inviting a (supporting) Congressman to lunch ...

It is criminal how the politicians spend the 98% of the populations hard earned tax money. The F-35 jet fighter is a failed government contract which should be stopped before more \$\$\$\$ is wasted for its development. This plane is being built to destroy, violence begets violence. It will have a ruinous effect on the atmosphere, the ambiance of the surrounding communities and the air, water and noise level compromised. The City of Burlington has a moral obligation to prevent harm and further the good of all. The City Councilors should support the resolution to stop the basing project of this community as a message to Washington politicians.

VOTE NO on the F-35: because: The PEOPLE will not be helped, nor do the People want this. Lockede will benefit...but..... we all know that trickle down doesn't work! What will Burlington really get...besides a demented environment and droned - out life ? Last but probably MOST important, it's a NATIONAL SECURITY issue! People around the world HATE drones...a lot of peole in the world hate that, so..Burlington, you will become ground zero for people who really hate drones. Why would any city council vote to be that place!???? Please say NO to the F-35\*\*\*\*\* Burlington .VT will now be known as the Home of the Drone!

The F-35 is another of many, many boondoggles used to make military contractors rich, to open doors for military brass in the so-called defense industry, and to get mindless shells (I.e., politicians) re-elected for bringing the pork home. The entire Pentagon needs to be brought to heel with a complete audit and on-going yearly audits fully transparent to the public, who has been ripped off for decades--all in the name of patriotism and national defense.

It is wholly inappropriate to base these warplanes in a densely-populated urban area. We will be safer and freer without them, and the idea that we are desperate for the associated jobs is a canard. The costs and risks of bringing the F-35s to Burlington far outweigh any perceived benefits. We can do better!

My! My! Don't "We" Americans just love the way our tax dollars are wasted and wasted and wasted. Not to mention, when our military machines, planes, etc., do operate, they're killing innocence around the world. Hey Republicans you hate Obama Care, well, what about this deadbeat tax eating pac-man? "Operations and maintenance costs alone will exceed \$1 trillion over the fleet's 35-year lifespan. "Congress may want to consider whether the funding assumptions are reasonable in our current fiscal environment," Ya think??

Consider the children's hearing loss from exposure to the intense noise, the disruption to your lives. Other communities are banning the F-35 for these and many other reasons.

I strongly urge you to ban basing the F-35 warplanes at Burlington International Airport. Burlington is not the only community potentially impacted by this decision, but it is one of the few who has the ability to vote against it. The negative impacts to the human environment resulting from the F-35 plan far outweigh any potential benefits.

President Eisenhower said in 1961, "In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military industrial complex. The potential for the disastrous rise of misplaced power exists and will persist." A task every president since Kennedy and doubly so since Reagan has failed in. Balance the budget by redressing this failure of the Congress to control military spending.

Having grown up in Vermont, this issue is of special importance to me. I am continually finding that we as a nation are spending way too much time and money on war machines to protect ourselves from the enemies that we are out there creating by being self-centered money warshipping and greedy. We need to stand for what is right and speak out against this and other actions that put our money into war while our social programs are being defunded!

There is no reason for a military piece of property, let alone, a very expensive, highly sought-after top-secret military hardware, should be in a civilian airport, where it cannot be adequately secured from potential terrorists or those willing to use it against the country.

Living in the flight path of Naval Air Station Whidbey's "Growler" aircraft, I can tell Burlington that this so called "sound of freedom" is deafening. All conversation stops and forget the phone conversation when one goes over. You would be wise to bar the F-35, just for that reason, let alone helping to halt the Military-Industrial-Congressional complex' march to bankruptcy.

The last thing this country needs is another stupid F whatever WARPLANE. Like we aren't weaponized to the max as it is. I fear for the people of Burlington. The last thing they need is a Warplane stationed at their public airport. Please BAR this ridiculous proposal. How about creating some jobs so that people can afford health insurance. Maybe a national transportation system utilizing non polluting high speed trains that connects us all.

The F-35 is a program that should have been cancelled years ago! The performance specifications have repeatedly been lowered so that the plane can meet them. Meanwhile, the F-35 is performing WORSE than the planes it was meant to replace!

This is a real example of waste and unnecessary expense for taxpayers and it needs to stop right now. The contractor has failed to justify any more payments and has failed in the project miserably ! Cancel that contract and payments and recoup the money if it can be done...no company has leached more wasted money than this one has, that we know of !

Shelagh McNary Mayhew  
Washington, MO 63090  
Oct 3, 2013

---

I'm guessing that no one on the city council lives in the affected area. The people who do were not expecting to have a noisy jet to contend with. For those who thinks the Air Force keeps us safe. Where were they on 9-11? Unfortunately, people see the military as the only economic engine for their area, and people can't seem to fathom that this is by design. Since when does the congress cut down on the type of military spending that the F-35 represents. They will cut back on civilian staffs to make the local people suffer for awhile so they will be appropriately grateful when spending levels return. Being manipulated by the military higher ups and their corporate allies is not freedom to me.

Rather than trillions to develop more instruments of war, we need to develop strategies and policies of peaceful non-violence to solve conflicts !!! Rather than spending trillions of the F-35 jet, we might better spend our efforts and money to help those most in need in our country that have been too long ignored and forgotten !!!

David Bremenstuh, Education Laureate

Cut off funding for F22, F35s, B2, B52 Bombers, close Guantanamo and SOA, restore habeas corpus and due process. End abusive tax havens, curb CEO pay, impose a Wall Street speculation tax. Open Medicare (suspend individual insurance mandates), lower eligibility to 55, negotiate for lower drug prices like the VA, include alternative medicine, end price gouging by hospitals, ERs, medical suppliers, etc, end price fixing by AMA, hold PHARMA accountable for damages to patients, do not allow medical records to be sold to drug companies, and do not allow the IRS to monitor whether people buy inadequate, over-priced insurance products that do not protect or provide comprehensive health care, contain costs, or prevent medical bankruptcies. Overturn Citizens United. Oppose the TPP. Support living wages nationwide. Oppose the chained CPI, do not raise the retirement age. Remove the Cap on wages subject to SS payroll taxes.

I have family daughter and grandchildren living in Burlington and don't believe they should be subjected to such a boondogle. It's a great city and would be greatly diminished by this F-35 disaster of a general's toy

Daniel Davis  
Central Point, OR 97502  
Oct 3, 2013

---

This is a total waste of my taxpayer dollars. We simply do not need a next generation of warplanes to defend this country. Ending the F-35 program completely will not compromise our national security to the slightest degree.

I've lived in Vermont. The beauty to include the quiet offered by nature would be devastated by basing the F-35 Warplanes at Burlington Int'l Airport. Once it's there it's like trying to get rid of tar on a rug. Now's the time to stop it.

I say , not only should the f 35 be barred from any base , the planes should be discontinued and the moneys for each discontinued item be given to the school systems that cannot pay teachers , so we can teach the kids things like mediation so peace and love be taught instead of hate and war.

The presence of fighter jets renders a place unfit for those who have other options. The decibel level is startling, distracting, and ultimately unhealthy. The economy, quality of life, and aesthetics of a place are significantly degraded by noise pollution, so I urge you to preserve the city and the surrounding area.

We don't need the F-35. We have dirty Predators that wipe people out now. We can also reduce Air Craft Carriers as we don't need to have so many on the Sea any more to land air craft. Look at the billions that can be saved. Don't let the F-35 destroy your peace and quiet.

Amazing! The GOP shuts down the government on demands of 20% of representatives, but still insists on building a 40 \$billion airplane that even the Pentagon says is useless. Is this naked corporate greed? or just simple- minded greed? We could put ALL of those people (and THEN some) to work on public works project, AND rapidly raise the economy by killing the F35, instead of killing public services. But, HATRED comes out, the President might get some well deserved credit. The Hate Obama moguls who drive the Tea Potty can't permit THAT.

Allowing this aircraft to be based @ BTV would significantly degrade the quality of life for residents of Ward 1 and Winooski. This is NOT the best place for this type of aircraft. Telling the airforce that the F-35's are NOT welcome here is an important step.

Larry Lewack

In addition to the usual concerns about noise and property values, PLEASE reject the F-35 for the sake of our air quality! Health is at stake! Also, for the sake of preserving our political culture; we don't want an infusion of ultra-conservative military personnel or employees of military-dependent industries. Both a healthy political culture and new economic development should be based on clean energy, not pollution and violence.

I have often comment, that Vermont is the leading state in the union for thinking ahead and supporting the right causes. I Urge Burlington City Council to once again be a leader and support banning F-35 base at the International Airport.

Do not let yourselves be bullied into accepting the F-35's at your airport. Insist that if the government wants to create jobs they should be for things you need like infrastructure, more teachers, low interest loans for small business etc.

I live basically in the backyard of the airport, right by the Guard's hangars. The F16 and helicopters are already so loud they disrupt conversations, TV or radio as well as shake things on walls and tables. If the F35 rolls in, I shudder to think about the end result on my already diminished quality of life while living so close. It's really a shame that those of us financially unable to live far enough away from the noise and air pollution must suffer with it at the whims of those that do.

This is my hometown and I really care what happens to the overall quality of life issue, not just the noise factor, but what hosting the F-35s here says about our values. Right now our government can't pay its employees - but somehow it seems like a reasonable idea to build planes so outrageously priced that even the helmets cost \$500,000? We can't support that kind of madness

VT not a strategic location... No change to Air Guard Mission if not based here... Not proven in air... Unsafe noise levels... Basing will not increase jobs, yet negatively affect 2000 homes... and let's not forget the capacity to level this city... What could possibly be the driving force for a pro F-35 vote? Is it the opportunity to use your vote to make money developing, Miro? Is it the strategy to create a poverty sink under the flight path to aid in flushing undesirables out of Burlington? What could it be? The "noise lovers" have not stated a single supportive fact outside of pride for keeping the machine well oiled. That is not enough.

I urge the council to vote to ban basing of these planes for the first round to allow citizens time to have an open discussion where there is a thorough exploration of the facts and a full sharing of views. This decision to select Burlington as the first Air National Guard site was made much too hastily.

About 6 months ago I had to bring my cat to the BEV emergency room. While there I heard an ear-splitting roar and in response I almost (seems laughable now) got down low on the floor to protect myself. I soon understood it was the jet. It was that loud and scary and that wasn't even the F35 and I am a grown woman. Burlington is NOT the area for such a machine.

I know it is difficult with all the political pressure placed upon you, but please stand with Winooski and do the right thing. If little Winooski has the courage to say no, I hope you will find the courage within yourselves to represent the people of the community and not buckle under political pressure. Love the Guard, but if thier mission has outgrown the space available, then they need to find a new mission that fits the community. Be brave.

Tanks and planes on the sidelines can't protect us as well as trained and educated citizenry. In WWII the US built and redesigned its fighting capabilities in response to the real and present dangers facing it. The real and present dangers today are structurally deficient or fracture critical bridges and would-be students with no technical or academic opportunities to pursue.

I would hope the councilors would remember that the responsibility of the council is to the businesses and residents of THIS community. There is a major conflict between maintaining the character of Burlington while allowing it to be used as a base for the F-35 bomber warplanes. Don't be bamboozled by the jobs-at-any-cost arguments of Vermont's short sighted politicians

Looking for 1/3 cut in defense spending before even considering new cuts in so-called "entitlement" programs.

Keith M Corbett  
Newton, MA 02464  
Oct 1, 2013

---

I generally believe that Keynes ideas and the resulting government policies generally are a good thing, WHEN IT IS PROPERLY APPLIED. And by "properly applied", I mean that our governments (at all levels) commission "public works" projects that TRULY ARE USEFUL TO THE GENERAL PUBLIC WHEN THE ECONOMY IS SUFFERING, borrowing if necessary through available bond markets. BUT / AND Keynesian thought also stipulates that these governments should DILIGENTLY AND AGGRESSIVELY pay-off / pay back those debts WHEN THE ECONOMY IS IN GOOD SHAPE. That second clause of Keynes' recommendations offer is ignored and disregarded in practice, at least at the Federal level. And I believe that this neglect of Keynes' second principle is a significant factor in all the arguing and deadlock we've been seeing in the U.S. Congress since the beginning of Ronald Reagan's presidency. Beyond, that, government commissions for new weapon systems and other military ordnance generally are an ineffective and wasteful way of creating jobs and putting more cash into circulation, especially when you consider the great propensity for cost overruns and serious defects in the design and final quality of these commodities. So, I am all in favor any actions that will help dissuade the Federal government from further investments in new weapon systems. I believe the capabilities of our present stock of equipment should be sufficient to provide the U.S.A. with military superiority over most the world's other nations for the next 20-to-25 years!

The F-35 Warplane is a continuation of the "Good-ol'-Boy" network attempt to keep our nation FEARFUL of false threats against civil society, for the purpose of holding on to white-male-ego power structures which have destroyed millions of innocent lives and poisoned environments world wide. STOP the military machine in its tracks by burying this F-35 project NOW!!! De-fund this useless military mind-set!!!

Though currently a resident of Charlotte I am a member of a church in Burlington and a member of Vermont Interfaith Action which works for affordable housing and healthcare access. Chittenden County's Regional Plan, ECOS, calls for maintaining and developing the area's stock of affordable housing, jobs that create a viable peacetime economy, and environmental protection. The F35 basing in Burlington appears contradictory to these goals, and creates risks that are destructive to our community. Please vote to keep F35s out of Burlington!

I as a former pilot of single & twin engine aircraft am completely opposed to the arrival of the F-35 Aircraft. My reasons, quite clear. The F-35 arrival, while creating a small infrastructure of job base, in the long run, could result in the risk of safety to civilians, as well as endangerment to the environment, upon a crash. We've got to way out the possibilities. The F series of fighter jets to date, are not without their downfalls. Ones which the F-35 would have a negative impact to civilians, the environment, the expense of clean-up after a disaster, and the residual affects to health consequences, such as hearing loss, etc. to our neighbors on the perimeter of flight patterns.

Tina Marie Bradley

Universal Movement of Consciousness by Edson Udson (all rights reserved) A great movement for peace, love and freedom around of the world, but to obtain results and do solve problems as poverty, abuses and violence is necessary "union" and "good will" translated in a simple word..."love". Respecting and preserving the nature or combating differences as racism, sexuality or culture and accepting any kind of love, no discriminating anyone in anywhere for anything. I believe it be possible...because love, respect and freedom are all of good. for worldwide children

I live on a quiet island and the US Navy Growler jet plane overfly despite promises that they won't. Citizens need to stand up to ridiculous plans! The consensus is that the F-35 is a poorly performing plane that made it through all the portals only because of political pressure from manufacturers, and is unneeded by the military and has had serious crashes. Second is Vermont not wanting heavy military stuff based here, In part because the planes have a history of crashing.

Aren't the engines for this plane manufactured in, or next to, Boehner's district? And isn't the requirement that US military must purchase 2 engines while the plane only needs 1. Now we have a huge back log of F-35 engines, many of which are getting old. Close that plant and it's bye-bye Boehner, sniff, sniff!

F-35 fighter jets have no place in a city long committed to peace, nor do they have a place flying out of the city's commercial airport. This is all about money—not what is best for the state or the community. The presence of absurdly expensive weaponry runs counter to all this community has expressed, again and again, in active resistance to the use of force to engage conflict.

Thank you for having the courage to stand up against pork barrel spending. I wish more communities would show that kind of "spunk" This type of spending is ruining our budget. When we spend money on weapons that are obsolete, don't perform as intended, or that the military does not need or even want, we are hurting other areas of our slowly recovering economy. Bravo to you, I urge you to support the resolution to bar the F-35 from your airport and your communities.

The wealthy elites have gang raped my country, and the world! Get your priority's in order! You have to do this first! You have to end the Corporate Coup of my country, and around the world! "The welfare of the many, mater more than the welfare of the few, or of the one! " See; Making the World Safe for Banksters: Syria In the Cross-hairs By Ellen Brown, Web of Debt" In an August 2013 article titled "Larry Summers and the Secret 'End-game' Memo," Greg Palast posted evidence of a secret late-1990s plan devised by Wall Street and U.S. Treasury officials to open banking to the lucrative derivatives business. To pull this off required the relaxation of banking regulations not just in the US but globally. The vehicle to be used was the Financial Services Agreement of the World Trade Organization. The "end-game" would require not just coercing support among WTO members but taking down those countries refusing to join. Some key countries remained holdouts from the WTO, including Iraq, Libya, Iran and Syria. In these Islamic countries, banks are largely state-owned; and "usury" – charging rent for the "use" of money – is viewed as a sin, if not a crime. That puts them at odds with the Western model of rent extraction by private middlemen. Publicly-owned banks are also a threat to the mushrooming derivatives business, since governments with their own banks don't need interest rate swaps, credit default swaps, or investment-grade ratings by private rating agencies in order to finance their operations. Bank deregulation proceeded according to plan, and the government-sanctioned and -nurtured derivatives business mushroomed into a \$700-plus trillion pyramid scheme. "So get used to how international relations work in the age of newspeak. General Abdel Fattah al-Sisi's army in Egypt can kill hundreds of his own people who were protesting against a military coup. Washington couldn't care less - as in the coup that is not a coup and the bloodbath that is not a bloodbath." See; Truthdigger of the Week: Ellen Brown; The Leveraged Buyout of America. By Alexander Reed Kelly "We learned during the fallout of the crisis that, with regard to the running of society, much of what bankers do today is unessential. True, money must be created, loans must be made and we do need a place to store and exchange it all, but the bulk of Wall Street's ongoing activities amount to little more than the transfer of existing cash (or money that it creates with the stroke of a keyboard) from the massive poor and middle-class public to the wealthy few, or from one rich person to the next. It is a beautifully constructed confidence trick that evolved over decades as an elite few sought to dismantle laws written in response to the Great Depression that ensured that the wealth created by private and public enterprise would be enjoyed by a greater share of the public. The crash of 2008 demonstrated the dangers of letting the financial industry govern itself. Then the laughably inadequate regulatory response from Congress and the subsequent recovery-for-the-rich-only proved beyond a shadow of a doubt that the banking class owns all three branches of the U.S. government. That means that wherever it threatens the interests of the rich, political democracy exists in name only. As Truthdig columnist Chris Hedges has repeatedly said, somewhere along the line our government underwent a "corporate coup d'état in slow motion." Through the genius wiles of private finance, the American government became a beneficence and protection racket for the rich." The result has been a massively risky \$700-plus trillion speculative derivatives bubble. Lokey quotes from an article by Bill Frezza in the January 2013 Huffington Post titled "Too-Big-To-Fail Banks Gamble With Bernanke Bucks" See; The Armageddon Looting Machine: The Looming Mass Destruction from Derivatives. By Ellen Brown, Web of Debt "The easy subprime scams of yesteryear are no more. The void is being filled by the shadow banking system. Shadow banking comes in many forms, but the big money today is in repos and derivatives. The notional (or hypothetical) value of the derivatives market has been estimated to be as high as \$1.2 quadrillion, or twenty times the GDP of all the countries of the world combined. According to Hervé Hannoun, Deputy General Manager of the Bank for International Settlements, investment banks as well as commercial banks may conduct much of their business in the shadow banking system (SBS), although most are not generally classed as SBS institutions themselves. At least one financial regulatory expert has said that regulated banking organizations are the largest shadow banks." See; If 80% of us are in or near poverty than THERE IS NO MIDDLE CLASS. See; Greenwald Partner Falsely Detained as Terrorist: How to Create a Dictatorship! By Juan Cole See; Obama's Friends in Low Places, By Robert Scheer See; Cornel West and the Fight to Save the Black Prophetic Tradition! By "Chris Hedges" See; The Death of Truth! By "Chris Hedges" See; The Final Battle! By "Chris Hedges" Pope Francis: Money is the root of all evil EXTRACT OF POPE'S HOMILY (Source: Vatican Radio) Money sickens our minds, poisons our thoughts, even poisons our faith, leading us down the path of jealousy,

quarrels, suspicion and conflict. It drives to idle words and pointless discussions. It also corrupts the mind of some people that see religion as a source of profit. 'I am Catholic, I go to Mass, everyone thinks well of me... But underneath I have my businesses. I worship money'. And here we have the word we usually find in newspapers: 'Men of corrupted minds'. Money corrupts us! There's no way out." "We can never serve God and money at the same time. It is not possible: either one or the other. This is not Communism. It is the true Gospel! They are the Lord's words. While money begins by offering a sense of well being. Then you feel important and vanity comes. We read in the Psalm. This vanity is useless, but still you think you are important. And after vanity comes pride. Those are the three steps: wealth, vanity and pride." "But, Father, I read the Ten Commandments and they say nothing about the evils of money. Against which Commandment do you sin when you do something for money? Against the first one! You worship a false idol. And this is the reason: because money becomes an idol and you worship it. And that's why Jesus tells us that you cannot serve money and the living God: either one or the other. The early Fathers of the Church, in the 3rd Century, around the year 200 or 300, put it in a very blunt way, calling money 'the dung of the devil'. An so it is. Because turns us into idolatrous, fills our thoughts with pride and leads us away from our faith."

I urge the politicians who hold power over this decision to listen to the still small voice of conscience inside them, and to act on behalf of the children and families whose health and homes are threatened, rather than on behalf of industrial profiteers. This war plane, which even the military does not want, is an emblem of the fundamental questions of our time. Will we as human beings continue to harm, and waste, and treat the most vulnerable among us as disposable nobodies for the sake of corporate wealth and political ease? Or will we have the courage from the core of our beings to stand up and say, "No, Enough!"

We don't need anymore F-35 jet fighters. We don't need them in Burlington, we don't need them anywhere. We, as a people, need to rise up and find ways to end conflict, OTHER THAN WAR. This country already has enough WAR planes. The selfish adolescent-thinking war-loving Republicans and Teabaggers don't like the gov'mint anyway, so why would they want to pay for another war jet. They love wars, and are even willing to manufacture illegal ones (Iraq) but they don't want to pay for them once they get them instigated. So WHY should we pay for another war plane? Do not destroy the City of Burlington just for another war mongering effort. The adolescent-thinking spoiled brat Republicans and Teabaggers who are selfish and conscienceless enough to destroy the whole economy of the USA SURELY will think this is a total waste of money. Do not destroy the city of Burlington with a war-loving plane. Through nonviolent conflict resolution, May Peace prevail on Earth

Although we live in Maine, we frequently visit our good friend who lives (and is a university professor) in Burlington. We strongly share her feeling that basing the F-35s in Burlington would be a disaster for the city.

---

Wasted tax dollars and the imposition of a lower quality of life for those living near the airport (who happen to be lower income families) make the F35, in general, and it being based in Burlington specifically, a terrible idea.

There have been some boondoggles in the past, but nothing that is even close to this one. It's already cost the taxpayer over a trillion dollars and currently has no hope of flying in combat or at night or in bad weather. Thank you, City of Burlington, Vermont, for taking a stand for everyone in America.

I teach at the Community College of Vermont in Winooski. The planes fly directly overhead--taking off and landing numerous times during our 2:45 min. class. Everything stops. The students are distracted. The new planes will be louder....Impossible to even imagine. Stop the F-35 now!

leora dowling  
Vergennes, VT 05491  
Oct 1, 2013

---

I recommend basing the F-35 at a remote air force base, where it can be more safely tested and improved. In the future, it may be appropriate to base the F-35 at a greater variety of locations.

My house is flown over by F16s now, and it's awful. I can't bear the thought of what the F-35 would be like. I'm trusting in the wisdom of the Burlington City Council to put a stop to this madness.

According to the airforce study, the F-35 is not a net economic gain for the Burlington area. Furthermore, it will create adverse health effects and adverse impacts on local communities. This will also lead to an emptying of some residential areas and declining property values -- a recipe for increased crime and other social problems as well.

In addition to military spending in general that takes away from our desperately needed domestic budgets the F-35 has long been a symbol of the worst cost overruns and functional failures in the so called "updating" of our weapons systems.

Mickie Lynn  
Delmar, NY 12054  
Oct 1, 2013

America a democracy? My ass. America Christian? My Lord. Name a true democracy, not even Christian, that loves to cut education, shelter and food for children, the poor so it can waste billions, trillions on worthless high tech toys and lacking fair tax laws? Only America.

Many of "we the people" are weary and becoming hardened about asking our Congress to have self-control and sane direction with public resources. But no, it seems to be too much to ask of them. Come on now, waste is just waste and unacceptable. The F-35 is a waste and will cause only harm.

Burlington has no right to destroy the home values and damage the health, especially of children, in neighboring communities. The U.S. has no need of this bomber except to attack small countries. This is corporate welfare at it's worst when money is desperately needed to meet other priorities. This is just stupid if not criminal.

Politicians routinely and conveniently overlook bloated pork-barrel defense spending when they whine and cry about the national debt. They just want to play with their shiny new trillion + dollar toys and everyone else will just have to suck it up and tighten their belts another two or three notches to make sure it happens. The F-35 project is a despicable rip-off of American taxpayers.

The F-35 is an expensive boondoggle that will never work properly. It is a perfect example of what is wrong with military procurement. Not allowing them at Burlington International Airport will help to bring supporters of this expensive failure to their senses.

Hold firm against basing F-35 aircraft at Burlington International Airport. These boondoggles are a national disgrace especially in a country whose elected Republican congressmen have voted to shut down the Federal government because they want to defund badly needed health care legislation. When my Social Security check fails to arrive on time, and I can't pay my rent, I will not forget who is responsible come the 2014 and 2016 elections.

The F-35 is the BIGGEST boondoggle ever seen in American history!! It is ill-conceived and will never perform - after we spend BILLIONS of tax-payer money to a few contractors. And that's in addition to the environmental impact on your city. Please help us stop this project by starting with the vote against using your airport.

Well past time to end the insane level of military spending in this country.

Michael Rush  
Poulsbo, WA 98370  
Sep 30, 2013

---

As a visitor to Burlington last year I was so impressed with your progressive city and the obvious values inherent in the public policy and the beautiful spirit of your people. Do this for us all, and I hope my home town of Eugene, Oregon can find its own way to follow your lead.

Yes, yes, yes! This is such a very important issue for your community. I support the ban wholeheartedly and wish you the best in this endeavor. Your community will never be the same if the unnecessary planes are allowed. You should be allowed to decide what your community should look like, now, and for your children.

Letting this project go through is unconscionable. How many Americans' hungry bellies, homes, educations, and general quality of life could we improve immeasurably with the huge sums that might go into this unwieldy killing machine....

Let's start paying attention to President Eisenhower's warnings about the military/industrial complex. It's killing our country! We do NOT need to be a super power -- unless the wealthy want to pay for it. We who are hard working Americans want our money used responsibly, not just shoveled into the military's insatiable mouth!

This buying military equipment that costs such enormous amounts of money is long overdue. Military spending is way over acceptable and is very mind numbing. That money needs to go to other important needs of the government.. Aerospace is costing enormous amounts of money and we can't really afford it.

The F-35 never performed as promised. No one even determined that the F-35 could land on an aircraft carrier properly before the first F-35s were built. The STOL capability, one of the few reasons to bother building it, doesn't work and so that version isn't even available. This has been a very expensive waste of our money. No one should be allowed to waste amounts of money so vast they could easily solve major problems such as homelessness.

It's important to give sincere consideration to the peace and tranquility of the communities under consideration as based for this weapons' system. Please take another look at whether Burlington is an appropriate location, taking into consideration not only the logistic and economic pluses derived by basing at Burlington, but look at the ways that quality of life as affected by increases in air and noise pollution. I'm certain you can give better consideration to these matters than I can outline here. May you do well.

With so many unanswered questions about the safety of the basing the F-35 in a heavily civilian populated community, I sincerely urge the Burlington City Council to support the resolution barring the basing of the F-35 war plane at the Burlington International Airport. How dramatically ironic that the peaceful tax paying citizens of the surrounding area need defend themselves against the very organization that is supposed to be defending it.

What's the difference between a corrupt democracy and any other form of corrupt government? Obama: "The rest of the world (God's: pop 7.0 billion (198 countries)) isn't stupid!" After all, isn't approximately one-third of that world already Microsoft free? 2008-04-03: Brazil, India, and China, which together count for more than a third of the world's population, all voted against Office Open XML last week. Address : <[http://www.informationweek.com/news/software/productivity\\_apps/207001577?\\_requestid=118181](http://www.informationweek.com/news/software/productivity_apps/207001577?_requestid=118181)> Patriotism begins with knowledge, not lies and propoganda. Most of society, including the majority of all the world's Christianity, prefers the knowledge. -Ron Wike Vietnam veteran

I am signing this petition as a taxpayer, citizen, and veteran. The F-35 is a tremendous ripoff. And it has a devastating effect on surrounding communities. We must take steps to block it.

I live in Panama City and these roboplanes fly out of Ft. Tyndall Air Base for training locally, the folks I've spoken to who are associated with them (Air Force personnel) are NOT impressed, for the price tag they expect much, much better equipment. This is clearly a political payoff for a lot of our sleazy politicians and their plutocratic benefactors who are making millions off of this farcical fighter jet imitator.

We just spent a week in Vermont as Leaf Peepers, and loved it. I didn't get the impression that Vermonters were in favor of pollution, possible loss of income from the noise and subtle threat our war machine government is becoming. The military industrial complex is upon us, and it weights too much and costs too much. Lets learn non-violence instead. Spend money on that instead.

There is nothing good to be said for the F-35. It is years behind schedule and many billions over budget. Worse, it doesn't work. Do not endanger your constituents by siting this plane nearby.

The F-35 program is obscene. Over one and a half TRILLION DOLLARS have been wasted on this fighter jet that hasn't met any of its objectives. Just think for a minute how that same 1.5 TRILLION could be used to benefit all of the citizens of this country. Instead that vast amount of money has just been flushed down the toilet.

I worked for the military one summer. I am amazed that we ever won a war--and it certainly wasn't because of those in charge. They are a bunch of bickering 6 year olds. This is sinful waste of tax dollars that would be better spent elsewhere--like tossing them down a hole to plug it. Trust me--that would be better spent.

I'm sick of my taxpayer dollars being wasted on military weaponry that either fails to function properly, or that has no real use in contemporary battles. The money being wasted on the F-35 needs to be spent on rebuilding our nation's infrastructure and on expanding Social Security, Medicare, and improving public education.

I was listening to this news on the radio and could hardly believe my ears. Just because the financial benefit is spread over so very many districts, there is a conspiracy to steal such a huge sum of money from the taxpayers! And Shame on those, who must be sociopaths, do such while defenseless old folks' pensions and children's education is cut from them!!!

My question is, does Bernie Sanders support this? If he, indeed, does than I am with Bernie. If, in fact, he does not support this,, then you need to rethink and reconsider what you are proposing. Do the "short term" gains match with the "long term" gains? Do the "people" really benefit from this action? ?What if you all "gave a war" and no one showed up? Brigadier General McAullife summed it up, with the help of his guys on watch, when the answer was sent, "NUTS!"

Sue Miller

While the engines are built here in CT, I support the Burlington City Council and hope that you will vote in the interest of your city and stop the F-35's from using the airport. We need to stop the devouring of the US by the military. By the way, these warplanes have not been and will not be useful as we struggle against domestic and foreign terrorists. A weak America with a strong militray is not a strong America.

The finicky F-35 fighter jet should be scrapped. It has proven itself a boondoggle second only, as far as I know, to Star Wars. I am in Vermont often and love it. For its air, soundscape, public health, and more to be devastated by this useless war materiel would be a double waste. Please, keep the F-35s out of Burlington International Airport and tell the Air Force to send them to the scrap heap where they belong!

What do we need? Clean air to breath, clean water to drink, shelter, food, peace, and meaningful work outside of the military industrial complex. We don't need no stinking f-35's. 1.5 trillion is not enough to deal with the problems born of our last stupid wars - broken vets for instance, We don't need no stinking f35's. More humanity, less insanity.

Agree that the conversion to F-35s is a huge boondoggle, shows poor strategic planning, is expensive and will have very bad impact on localities where they are based. The public needs to call Congress to account on this, and meanwhile block them locally.

The failed f-35 jet fighter is the most disgraceful expenditure of taxpayer's funds in decades. It is plane unable to meet any of the design criteria. Bar the basing of F-35s at the Burlington International Airport to send a message to the military that we the people will not tolerate the travesty that the F-35 represents.

To disrupt the peace and quiet of a NE metropolitan area with jet fighters above is unwise and unnecessary. I am certain there are better, less environmentally sensitive areas available to the government – they should look harder to find one, assuming we truly need such a base in the first place.

While the F35 is truly an expensive welfare program, that money would better be spent providing food stamps to the very needy, mental health help to those on the streets begging for hand outs, rebuilding our failing bridges, etc.

Sign the petition - a first step in stopping the hemorrhage of our tax dollars to Lockheed Martin's F35 - a plane we don't need and has continuing problems that make it impossible to use in any military confrontation. This has been going on for years and Congress still will not stop funneling money to that military boondoggle. **OUR TAX DOLLARS SQUANDERED** by politicians being paid to keep the F35 project intact. Lockheed Martin and other military contractors are the push behind the effort to abolish Social Security so the money can be given to the Pentagon and then to those contractors to support unnecessary projects that never seem to end. Convince your local politicians to take similar actions against the F35!

You don't need the grief of fighter planes going in and out of the Burlington airport. US taxpayers don't need the grief of another bottomless pit for taxes that should be rebuilding OUR infrastructure. The world does not need the grief of more war planes spreading death. The Pentagon needs to beat the sword of greed and death into a plowshare of jobs and hope for the future.

We don\*t need F-35 planes anywhere..

Elisabeth Jeziarski  
Durham, NC 27707

Sep 30, 2013

---

We are a great supporter, financially as well as politically, of Bernie Sanders. We were traveling in our motor home to our aunt's home in Burlington (55 Overlook Park) in 1986, and we stopped at a gas station and recognized Bernie Sanders, who was mayor of Burlington (hope we have the years correct; close, anyway), and I jumped out and hugged him. Though we live in upper New York State, we are avid believers in everything Sen. Sanders believes. How we enjoyed his filibuster in the U.S. Senate. We're sure that Bernie supports ending the F-35 Warplane program; Bernie wants to focus on providing jobs, ensuring affordable education, health care, and housing for all Americans. My aunt and uncle, Hazel and Harry Smith of the Smith Furniture Company, were avid Reagan supporters and left no nephews and nieces a dime (they had no children). We had opposite political views, and they justifiably left their fortune to the Burlington hospital. Just what I would have done, had my niece been a Reagan supporter.

David and Carol White  
Clinton, NY 13323  
Sep 30, 2013

---

The military is a HUGE waste. No foreign enemy will ever kill 450,000 Americans per year (cigarettes), 40,000 Ams/yr (can't afford needed healthcare) or 23,000 Ams/yr (antibiotic resistance because well over 1/2 the ABs are fed to healthy farm animals to make them grow faster.) Add that up! I won't even list handguns and assault rifles. We have 2 huge oceans, Canada, and Mexico on our borders. How do other nations survive without such incredible spending on their armies? They do!

The F-35 is the most expensive piece of junk in the history of the world. Even John McCain says it's a piece of junk and he should know. He's the worst pilot in the history of the U.S. Navy. He crashed 3 multi-million dollar jets while flying over U.S. airspace, before he was shot down in Hanoi.

YES! Active Citizens demanding Integrity, acting with civility, courtesy, and truthfulness, with openness, and fairness are the priceless pillars supporting our liberty and free society. -- Robert O. Pritchard January 18, 2010, Sept 30, 2013

Robert O. Pritchard  
Cheboygan, MI 49721  
Sep 30, 2013

---

The F35 is nothing but more cash in the pockets of the war profiteers who send our young men and women to die in some foreign land and put the filthy lucre in the pockets of the corrupt bankers to take their edge.. This country is so corrupt that that Empire is ready collapse and take the profiteers and bankers with it. Then we may again build a peoples democracy and reinstatet it

The F-35 warplane is a super-expensive example of government waste. It would also,cause irreparable environmental,damage, noise pollution, and serious negative impact on the quality of life of those living near the airport. I strongly urge you to vote against allowing it to be based in - or even to utilize - the Burlington airport.

I will be moving back to your neighboring state, Maine soon, and would love to know that Burlington has denied access to its airport by F-35 warplanes. I can't imagine anything worse than having those jets zooming overhead morning, noon and night. In addition to the obvious and detrimental health effects to residents, there is the psychological impact that these jet fighters function solely for the purpose of killing.

How can Burlington, VT, entertain having a F-35 jet fighter base in the local area ? There is no reason to have this for the safety of the community. In fact, this base will create issues for the residents. It's a very suspicious proposal. Who gains from this idea?

These planes are a waste of time and money and have no place in our small communities. Redirect the money to all the urgent needs of our citizens and stop ruining our environment.

Chandra Holsten  
Ashland, OR 97520  
Sep 30, 2013

---

While supporters argue that the deployment of the F-35 is inevitable and Burlington might as well be the place to reap the touted job benefits, this is shoddy ethical reasoning by any standard, and masks the actual consequences of acquiescence: namely, selling a few thousand low-income residents' neighborhood for the price of at most a few hundred jobs, with no guarantees for local hiring, living wages, job security, etc. More fundamentally, a vote for submitting to the F-35 siting is a vote against the idea that municipal politics is a viable site of resistance to the unproductive (in terms of real human needs) behemoth of the security-industrial complex. Boondoggle "weapons systems" like the F-35 are only the most crystalline example of the US war economy's wasteful and destructive raison d'être: the enrichment of war profiteers at the expense of livable environment in communities worldwide. Since the irrational logic of this system is a necessary component of a broader monopolistic economy that relies on financialization, public plunder and the proliferation of useless toxic junk from Waffle-O-Matics to F-35s, there is little prospect of challenging this logic at the national level at present. This is perhaps one reason why so many of us in a place like Burlington choose to be involved in municipal politics: at the level of human-scale democracy where decisions affecting our neighbors are actually in our hands, we have the chance to make a powerful statement in favor of our neighbors in the "uninhabitable zone" — and also in favor of Burlington values, the values of a different kind of world. I urge you to vote in favor of those values and against the F-35. Sincerely, Robert McKay Old North

The proposal to base F-35 jet fighters at Burlington International Airport will have a devastating impact on the surrounding communities and the people who live in them, as is documented in the Air Force's own Environmental Impact Statement. Being the airport's owner and landlord, the City of Burlington has a legal and moral responsibility to prevent this harm.

We are sick of the thieves who run this Country stealing the money out of the Treasury. We don't need to add to the overstocked arsenals of weapons this Country already has. Also perhaps you have noticed that this particular airplane is a white elephant and is very harmful to the environment in which it is placed. Do not allow this pig to be put in your backyard. Sorry if I just insulted pigs.

Your community will never regret baring the F-35 from your airport. I hear military jets everyday while riding my bike throught a beautiful part of NW Ohio called Oak Opening. Not only that but I would encourage you to investigateTuson, Arizona problems with sound at their military bases.

Comment

Robert Wilkerson  
San Diego, CA 92104-4044  
Sep 30, 2013

---

The F-35 is the worst welfare program that the government ever gave a defenses company. It is the example of mismanagement, shoddy scheduling, and stealing form the taxpayer. The F-35 program has to be terminated and the company pay back all of the funding to the government to be used for social programs.

Yes, there may be jobs related to providing a base for F-35s. But the environmental and quality of life impact on Burlington, a city known for a high quality of life, will be far greater. The Air Force's own Environmental Impact statement makes this clear.

It's time to use our brains and do our best to make SMART decisions. The F035 is clearly not worth supporting because we cannot, as a Country, afford to continue wasting money on the war machine. Spend the money to improve the conditions for our Citizens. This action is a major first step along the way to letting our lawmakers know when they are continuing to fund wasteful projects.

It is insanity that Burlington has ever even been considered for these planes; the crash rate is astronomical for a craft that will be regularly flying over residential areas including schools, the noise levels are going to displace thousands of families and individuals who are already vulnerable due to their socio-economic status, schools are going to be disrupted, and veterans and refugees who suffer from PTSD are going to be subject to events which might trigger flashbacks for them

Craig Guild  
Burlington, VT 05401

Basing the F-35 in Burlington is an appalling idea. This plane has not tested well and we should not have it flying over the skies of the most populated area in the state. The noise level is medically proven to be deafening. This is happening just because Pat Leahy wants a little military feather in his cap to "honor" the Air Guard. It will carry cruise missiles. It will displace hundred of people from their affordable housing, a signature issue for Progressives in the past. It will terrify the recent vets and already traumatized immigrants. This is not what we need to go forward in Burlington. It is a step backward into supporting the military empire that is gutting the country by taking all our resources and using them for destructive and environmentally devastating programs.

Peggy Luhrs  
Burlington, VT 05401  
Sep 30, 2013

---

As a frequent visitor to the state of Vermont and Burlington in particular, I am saddened to hear of the proposal to base F-35 planes at Burlington International Airport. I urge the Burlington City Council to reject this proposed action.

The true measure of opposition to this plane is in the heartfelt individual letters written by opponents - not the erroneous and prepaid postcards distributed by business interests. The crash risk alone - and it will still be too high in 2020 - is reason to say no. As Senator Leahy's maneuvering reveals openly, even the Air Force knows this is the wrong place!

Anne MacLeod  
Winooski, VT 05404

The preponderance of evidence indicates that the F-35 would have a negative impact on the health of people, especially children, living in the vicinity of this aircraft. Please don't inflict additional sound and air pollution on this community. Furthermore, the F-35 is may never get built due to technical challenges that will likely prove too difficult to resolve- this, after countless billions have been spent. Do you want your name behind this boondoggle?

Having spent 15+ years within this type of environment (DoD), I am 100% against bringing the F-35 program to our beautiful state of Vermont. Not only is it a health and environmental impact issue, but it is a moral and conscious issue. We must choose a different path for our citizens by bringing jobs to this state that support what Vermont stands for - good health, clean environment, natural/organic lifestyle, creativity, tolerance, sustainability, and beauty. By promoting and contributing to more entrepreneurial and creative endeavors that provide real solutions to national and world problems - instead of building a wartime vehicle that promotes violence - we can be a model for other states to follow. There is a better life outside of militarism - and we, in Vermont, choose peace.

War planes in our small communities is not appropriate on many levels. Our schools where children attend will not be safe, the noise factor disturbs the quality of life for all, and the toxic fumes destroy the air we breathe. The air traffic also becomes unsafe.

The biggest taxpayer bilking ever? Lockheed Martin has failed over and over to deliver what was promised, and has not only missed on its budget multiple times, it has produced a plane that pilots say is not up to the challenges it was designed specifically to address. Don't cave to the military-industrial complex. Hold them accountable by barring the F-35 from your airport. Thank you!

It's not enough that the F-35 is the most expensive weapons program in history. Money spent on this overbudget boondoggle could have been used instead to build or refurbish HUNDREDS OF SCHOOLS, AND THOUSANDS OF MILES OF ROADS (providing jobs), AND FUND PRE-K AND HEAD START, AND SEND THOUSANDS OF POOR BUT WORTHY STUDENTS TO COLLEGE, ETC. ETC. ET AL. BUT THE POWERS THAT BE INSISTED THERE WAS NO MONEY. Instead, we pay a vast tab most of us DID NOT AGREE TO PAY. NOW THE F-35 WILL ADD TO NOISE POLLUTION, FORCE PEOPLE FROM THEIR HOMES AND DEGRADE THE VALUE OF OTHERS. DOESN'T THIS EXTREME SOCIAL AND ECONOMIC DISTORTION EVER STOP?

Mark McKennon

The Air Force & the City of Burlington should follow the recommendations of the Air Force's EIS. I am concerned that our home may be in the flight path and have no desire to tolerate the noise from these planes. Base warplanes on military bases, of which there are several in the Northeast area. I see no need to base them at civilian facilities.

In these everlasting wars in which we engage ourselves, warplanes should not be based in the United States. I know wars are profitable for certain corporations and therefore supported by certain 'congressional representatives;' however we should be ashamed of ourselves -- the wanton killing, maiming and destruction (Iraq the prime example). Need to ensure control of other countries' resources. Would we let other countries act militarily to control ours?

The proposal to base F-35 jet fighters at Burlington International Airport will have a devastating impact on the surrounding communities and the people who live in them, as is documented in the Air Force's own Environmental Impact Statement. Being the airport's owner and landlord, the City of Burlington has a legal and moral responsibility to prevent this harm.

The staging of Fighter Aircraft out of a civilian airport is so wrong-headed on so many levels as to be almost comical were the consequences of this idiotic proposed deployment, even without the prospect of a military disaster, not so deadly serious. This is just wrong, for the communities surrounding Burlington and for our National Air Defense, as well

When this issue first came up I decided to keep an open mind, and hear the concerns of both those who were for it and those who have been opposed. However, I did note that the town that will be affected most was Winooski, one of the poorest in our neighborhood (so to speak). It has always been clear to me that if the flyway for the planes had been over Shelburne (for example) the whole idea would never have been considered. At this point, knowing now what the detrimental effects it will have, including the injury that decibel of sound can do to a small child's brain, and that our military has said that the guard will not leave us, even if the F35s don't make it here, I am soundly opposed to basing the F35s here. If you live in Burlington and have not yet contacted your city councilor, please do so!

I moved near the airport so noise has never been the issue for me. What the issue for me is...is what bringing the F-35's to the most populated area in the state is doing to the housing around the airport. Seems that political power is trumping common sense!!!

Verity  
South Burlington, VT 05403  
Sep 28, 2013

---

We just moved out of Williston to get away from the fighter jets that already roared over our house hour after hour, week after week. Now we only hear a distant rumble...from a half hour away. But my family works in Burlington, and the noise is ridiculously disruptive as it is. Adding more to that is insane. If hearing loss were physically painful in the moment it happens, Burlington would have law suits like crazy already. People are entirely misguided by the idea that since it doesn't "hurt", it isn't causing incredible damage already. NO F-35!!!

Annelies McVoy  
Williston, VT 05495

Thank you for supporting this resolution. The area around our airport is too populated for the F-35 bomber jets. The noise level is already terrible in the city of Winooski. These planes would make it worse. I also would like to point out the danger of one of these planes crashing upon takeoff or landing in a populated area. The environmental impact of these planes is not right for the greater Burlington Vermont area. Thank you again

If pork could fly, it would be the F-35. Come to think of it, hasn't the effort to keep this particular bit of pork reliably in the air led to an enormous cost overrun? And since when has it been Vermont's province to fight an air war - as opposed to, say, protecting itself from natural disasters caused by climate change?

The F-35 program costs \$1.5 trillion. The plane can't fly in the rain, can't fly at night, and is unfit for the rigors of combat. Even John McCain voted against funding it. Basing the F-35 in Burlington would signal that it's acceptable to spend taxpayers money on useless weapons at the same time we fail to provide for human needs. In a country where one fifth of the children are poor and undernourished, that's cruel and obscene.

The bully-force of Patrick Leahy has strong-armed the USAF to base this decision on the whims of a pork-fat politician instead of what is best for both the mission and the surrounding residential populations. Shame on Patrick Leahy for this self-serving egomaniacal meddling which would doom Vermont to 50 years of intense pollution. His actions are a betrayal of trust to everyday Vermonters. His actions are not worthy of his position as a senator from a state which values its environmental stewardship. Pollution is theft and he is stealing Vermont's future! Stop the madness and stop the basing in VT. You Burlington Councilors have the power to prevent this dismal legacy. You can make a difference, but will you have the courage to protect vulnerable populations? I am praying for you to make the right decision on October 7th and oppose the F35 basing.

Alexander Ispa-Cowan  
Boston, MA 02215  
Sep 27, 2013

---

The area around the present airport is overly loud now with the sound of military aircraft and adding the F-35 will only drive down the property values further. Additionally Chittenden County has the most dense population mass in the entire state. If the F-35's must come to Vermont it doesn't make sense to insert them in an area where there is such a large number of people. Put it in a place where the population numbers are fewer and there is less chance of disaster.

Warren Mills  
Essex Junction, VT 05452

After weighing both the positive incremental economic benefits of transitioning to the F-35 against its attendant side effect costs: including - the negative economic and potential legal costs to affected property owners, the adverse effects on tax revenue and increased fire and safety protection costs to affected nearby city budgets; plus substantial noise effects, plus related health risks, plus the substantial crash risks - especially for downtown Winooski, I believe most rational citizens would conclude that the advantages of the F-35 simply are outweighed by the disadvantages for the majority of adjoining cities and their property owners.

Although we don't live in Vermont, we do live on the western NH border and are under one of practice areas. Although I am a former fighter pilot myself and recognize the need for constant training, the noise pollution from the existing fighters; the F-15, 16 and 22, is already too high and the F-35 is much worse based on all the reports I have read. But worse still is that not only is this a weapons system the US does not need, but it doesn't work; even Senator McCain opposes it as just another scam being perpetrated on the country by defense contractors. Please don't give this national travesty a home in Burlington.

If ever there was a glaring example of how rapacious corporatism has poisoned the nation to its very core, the F-35 is it. Let's start with the obvious: It doesn't work. Its operational systems are so insanely complicated that pilots can't fly it because the faceguard readouts disorient them, and even after a decade, the nerds haven't finished writing the code that controls it all! One point godalmighty trillion dollars for a clumsy barge that can't fly at night, in the rain, or even through cloud cover?!? Are you serious? It's stealth coating peels off at supersonic speeds, if it doesn't fall out of the sky first. It is so loud that 6,000+ residents of South Burlington will be displaced, and the Air Force buyout fund was drained after only a few hundred. The rest will be the victims of Mr. Pomerleau's depredations. I hope he wears bullet-proof underwear, because when his little scam is exposed, he's gonna need it. Can you say "CONFLICT OF INTEREST?" Lockheed-Martin spread contracts for this thing over 30-odd states. That's a LOT of congressional districts, but it made quality control impossible. Lockheed-Martin should be dissolved, its assets seized, and its executives jailed until their grandchildren forget who they are. Anyone foolish enough to continue their support of this disastrous monstrosity will regret it for the rest of their lives, because it IS going to crash. Just don't let it crash in Burlington.

Please do not be an accomplice to this theft of national resources -- a trillion dollars according to NPR on 30 September. The destruction of a middle-class neighborhood is symbolic of the devastation this kind of project has and will continue to wreak on this country.

Please stop turning Vermont's economy in to a military dependent wasteland. We do not want the F-35 under any circumstances, understand?

timothy price  
fairlee, VT 05045-9478  
Sep 27, 2013

---

The F-35 degrades our community on so many levels: our children, health, environment, safety, ruins property values, neighborhoods, communities. Robs us of our taxpayer \$\$ that could go to so many other necessary and needed areas. The cost for one jet is 30 million dollars more than entire BTV's city budget!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Christopher Hurd  
South Burlington, VT 05403  
Sep 27, 2013

---

Basing these planes in Burlington would put about 2,000 households in the Accident Potential Zones defined by the Dept. of Defense. Not acceptable!

Horace Shaw  
Winooski, VT 05404  
Sep 27, 2013

---

Fighter jets have no place at a peaceful community airport. Just because the Federal government wants something and is willing to pay for it doesn't mean you have to sell out the people. You can tell the USA government NONONONONO

I can't stress enough how important this is for Burlington . Once the airforce has these destructive killing machines here they will do as they please and nothing can stop them. Please consider all the harm it will and could do to Burlington as a tourist destination and all the Vermonters affected economically and healthwise as well as loss of quality of life here in Burlington.

The cost and quality of the F-35 program is an embarrassment for this entire country, and in particular should not be based in a community that does not share the militaristic values that led to its creation. Additionally, there are far less exceedingly expensive and vastly more productive ways to create a few new jobs for Burlingtonians.
