 Fair Poor
 STYLE: vernacular Victorian
 DATE BUILT: 1918

SIGNIFICANCE: Architectural Historic Archeological
 Historic Contexts:
 Level of Significance:
 Local State National

ADDITIONAL ARCHITECTURAL OR STRUCTURAL DESCRIPTION:

This eaves front vernacular house faces east with a wing recessed at the north side. A 1 story, central bay, front porch has a wood shingled half wall and thin Tuscan columns supporting a gable roof. It is screened and has shingle siding with an octagonal course. A 2 story porch at the north gable end has similar features, but is open on the first story and screened on the second. A 1 story bay window at the south gable end has shingles and contains a stained glass light. Most of the first story is covered with clapboard siding with corner boards and a water table. The second story has wood shingle siding. A centered wall dormer has fish scale shingles above its window and a course of shingles running parallel to the raking cornice. This detail is repeated at the gable ends. The windows vary in size, with most containing multiple vertical lights over a single sash. A back door features a small portico.

RELATED STRUCTURES: (Describe)

STATEMENT OF SIGNIFICANCE:

This vernacular house is distinctive for its exterior detail. The texture created by the combination of wood shingles and clapboard siding suggests a Queen Ann cottage style.

City maps and Burlington Directories suggest that Heman Crooker built this house c.1918. Crooker was a carpenter and lived next door at #318 North St. and later at #9 Hyde St. until 1918 when he moved into this house which was built on his property. Crooker's background as a carpenter is manifest in the detailed wood work on the exterior of this house. Crooker may also be responsible for building the two houses next to this one.

This house is built on what was formerly a large natural ravine which ran through Burlington before the Civil War. For over a decade the Central VT. Railroad crossed North St. at this location.

ADDITIONAL ARCHITECTURAL OR STRUCTURAL DESCRIPTION:

Massing - Gable end orientation, rectangular block. Shed roofed south elevation side porch 1/2 enclosed. Gable returns. Boxed cornice.
Fenestration - 1/1 sash, flat arches with standing voussoirs.
Entrance - Multipaned 20th century door. Flat arch, same as windows.
Enrichments - Crown molding beneath cornice.

RELATED STRUCTURES: (Describe)

1 bay, novelty sided, gable roofed garage behind building.

STATEMENT OF SIGNIFICANCE:

This modest Greek Revival was an early house for the North End of Burlington. It is similar to other 1/2 story Greek Revival frame houses that were used for workers housing. It was probably built during the Civil War for (or by) Levi Hicks.

Massing - Gable end orientation. Rectangular mass, all features contained within mass. 2 story canted bay window on facade. 2 story 2 x 2 bay porch on facade. Dormers on side elevations. 2 story 1 x 3 bay porch on rear with stairs.

Fenestration - 1/1 sash. Flat arches. Wood sills.

Entrance - Set back on southwest corner beneath porches. Multipaneled door with large rectangular light.

Enrichments - Turned posts with brackets, turned balusters. Polychrome, terra cotta panel between 1st & 2nd floor of bay window. The gables are shingled.

RELATED STRUCTURES: (Describe)

STATEMENT OF SIGNIFICANCE:

This Colonial Revival incorporates elements of the Queen Anne showing the continued influence of the style in Burlington construction. #42 is typical of the high quality of residential housing that is found in Burlington. It was built c. 1922 as the home of Alfred J. Richard, a mason. Richard probably built much of the house himself, as was quite common in the North End where there was a surplus of construction skills and a scarcity of labor. The high quality of these owner-built homes is a testimony to their builder's abilities and energy.

Fenestration - 1/1 sash. Plain trim.

Entrance - Undistinguished.

Enrichments - Lattice stick work with patera motif in gable. Wood strip with dentils below lattice. Canted butt shingles beneath denticular motif.

RELATED STRUCTURES: (Describe)

STATEMENT OF SIGNIFICANCE:

79 Hyde is a popular design for houses found throughout the North End of Burlington. These designs are characterized by the stick work in the gable. This house makes a significant contribution to the scale of the street by virtue of its size and massing and adds variety to the house types on the street.

This style was the standard design for builder John Roberts from c. 1880-1905. This house was built in 1902. The first owner was Harris Block, a dealer in boots and shoes.

Entrance - Aluminum, commercial door.

RELATED STRUCTURES: (Describe)

STATEMENT OF SIGNIFICANCE:

This former Jewish synagogue has been readapted and significantly altered for use as a carpet business.

The original structure was built in 1889 as the Chai Adam Synagogue at a cost of \$2,000. It housed Burlington's second Jewish Congregation, an offshoot from the original Ohavi Zedek congregation. From 1880 to about 1910. Burlington experienced a large influx of Polish and Russian Jews, who formed a very tightly-knit community in the North End. At the turn of the century they were the predominant ethnic group within a radius of three or four blocks of the synagogues (particularly Bright, Hyde, Archibald, and First (Riverside Avenue) streets. In 1910 the interior was remodelled in an elegant and elaborate Eastern European motif. In 1938, Chai Adam merged with Ohavi Zedek, and the building remained vacant until altered for use as a wholesale dry goods firm in 1955.
