

MARBLE AVENUE

Houses on Hayward St. and Marble Ave. form a cohesive unit of workers' housing characteristic of the late 19th and early 20th century. Most are oriented with their gable ends facing the street, and are set close to the road, accommodating small yards in the rear.

Initial development occurred in a T-formation, with clusters of houses on each side of Hayward St. and another cluster on Marble Avenue where it crossed Hayward. Some of these early houses are similar in plan to houses on King St. built by contractor John Roberts (156, 160, 164, 168 King St.). Others may be distinguished by their roofs which are enriched with bands of imbricated slates.

Located on Marble Avenue at the foot of Hayward St., was Joseph Liasse's grocery store and house. Originally, a small house like others on the street, around 1890, when Liasse opened the store, the roof was raised and the bracketed cornice and chevron-patterned panels were added. These features distinguish the building from its neighbors; and no doubt was an effective way of calling attention to his business.

As newer houses were built on empty lots filling Hayward St. to Marble Ave. and Marble Ave. down the hill to Pine St. (west) and up the hill to St. Paul Street (east). Many of them retained the gable-front orientation and close proximity with the street. To meet the needs of this growing community, another store, Bouchard's Meat Market opened. This business was housed in #21-23 Hayward St., a large, hip-roofed structure with an unusual, double-tier, bracketed cornice. George Bouchard ran his market in the south half of the building and lived in the north half.

By 1913, his business had grown too large for these quarters, so Bouchard built the Colonial Revival building next door at 27 Hayward St. (presently a laundromat) to accommodate his business.

Several houses on Hayward St. display interesting architectural features. #34 Hayward St. incorporates a hip-roofed tower and #38 displays a roofline broken by four gables. This house also utilizes slabs of scrap marble for steps, as does #31 Hayward St. #16, built c.1930, features a cornice enriched with a combination of exposed rafter-tails, vergeboards with curved and cut-out ends, as well as an architrave and frieze.

**ADDITIONAL ARCHITECTURAL OR STRUCTURAL DESCRIPTION:**

Massing - rectangular block with boomtown facade. Original ell & modern wing. Main facade divided into 3 bays by brick piers which project above the roofline. Gabled central bay. Original ell topped by a small frame structure with doors & windows.

Fenestration - some windows divided into 4 rows of 4 lights some double hung sashes. Concrete lintels and sills.

Door - double doors with glass paneled upper portions. Concrete gabled door hood which is bracketed and rests on the concrete lintel. Set into the pediment is a date stone reading 1917.

Enrichments - end piers enriched with patterned brick in square designs. Each bay decorated with a rectangular design in raised brick between the floors. Frame section above ell is clad with fish-scale shingles.

**RELATED STRUCTURES: (Describe)**

Metal tanks like silos on Pine St. side.

**STATEMENT OF SIGNIFICANCE:**

Built in 1917 for the Welch Bros. Maple Co., processors and manufacturers of maple sugar and other maple products. The business later went by the name of American Maple Co. (1926-29) and Penick and Ford Ltd. (1930-68). In 1968 the R. J. Reynolds Food Co. moved their operation here. This early maple industry was an inevitable application of the factory system applied to a traditional Vermont farm product in order to meet the demands of an eager national market. It may have been one of the first of its kind in the country.
